

SetBeacon for Shopping Malls

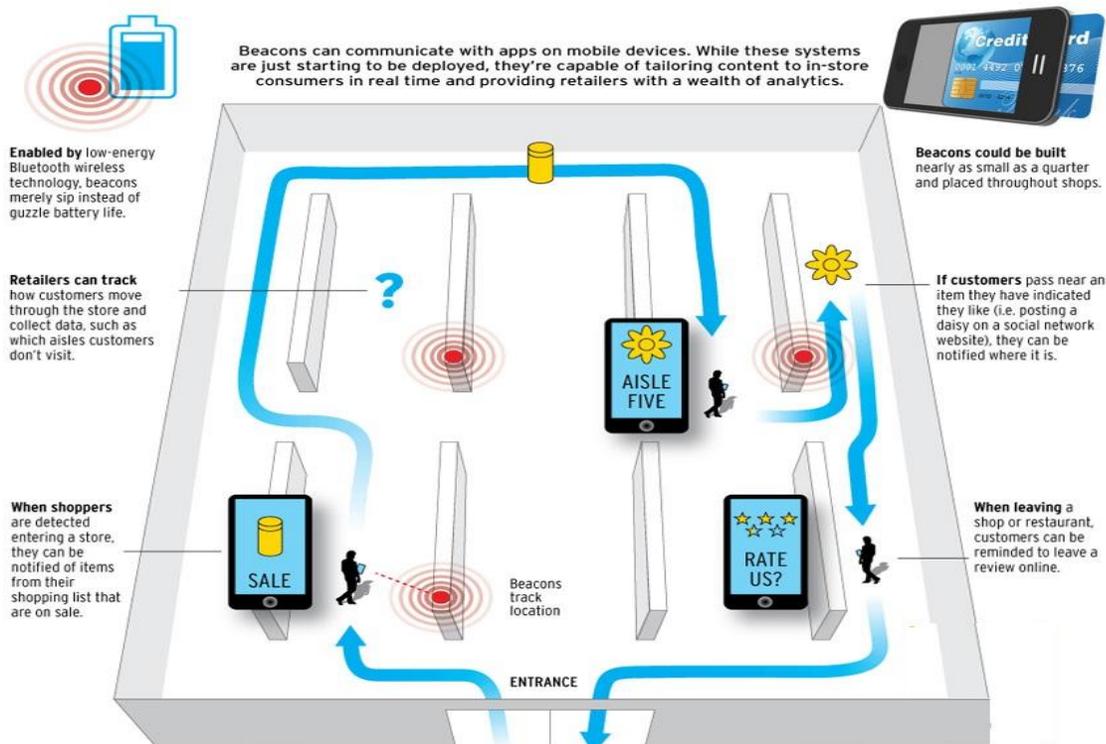

Our product “SetBeacon” is next generation digital advertisement product that allows businesses to establish a futuristic and direct communication with their customers. Using this product, any business can create a virtual perimeter and send notifications to the customers who pass through this perimeter.

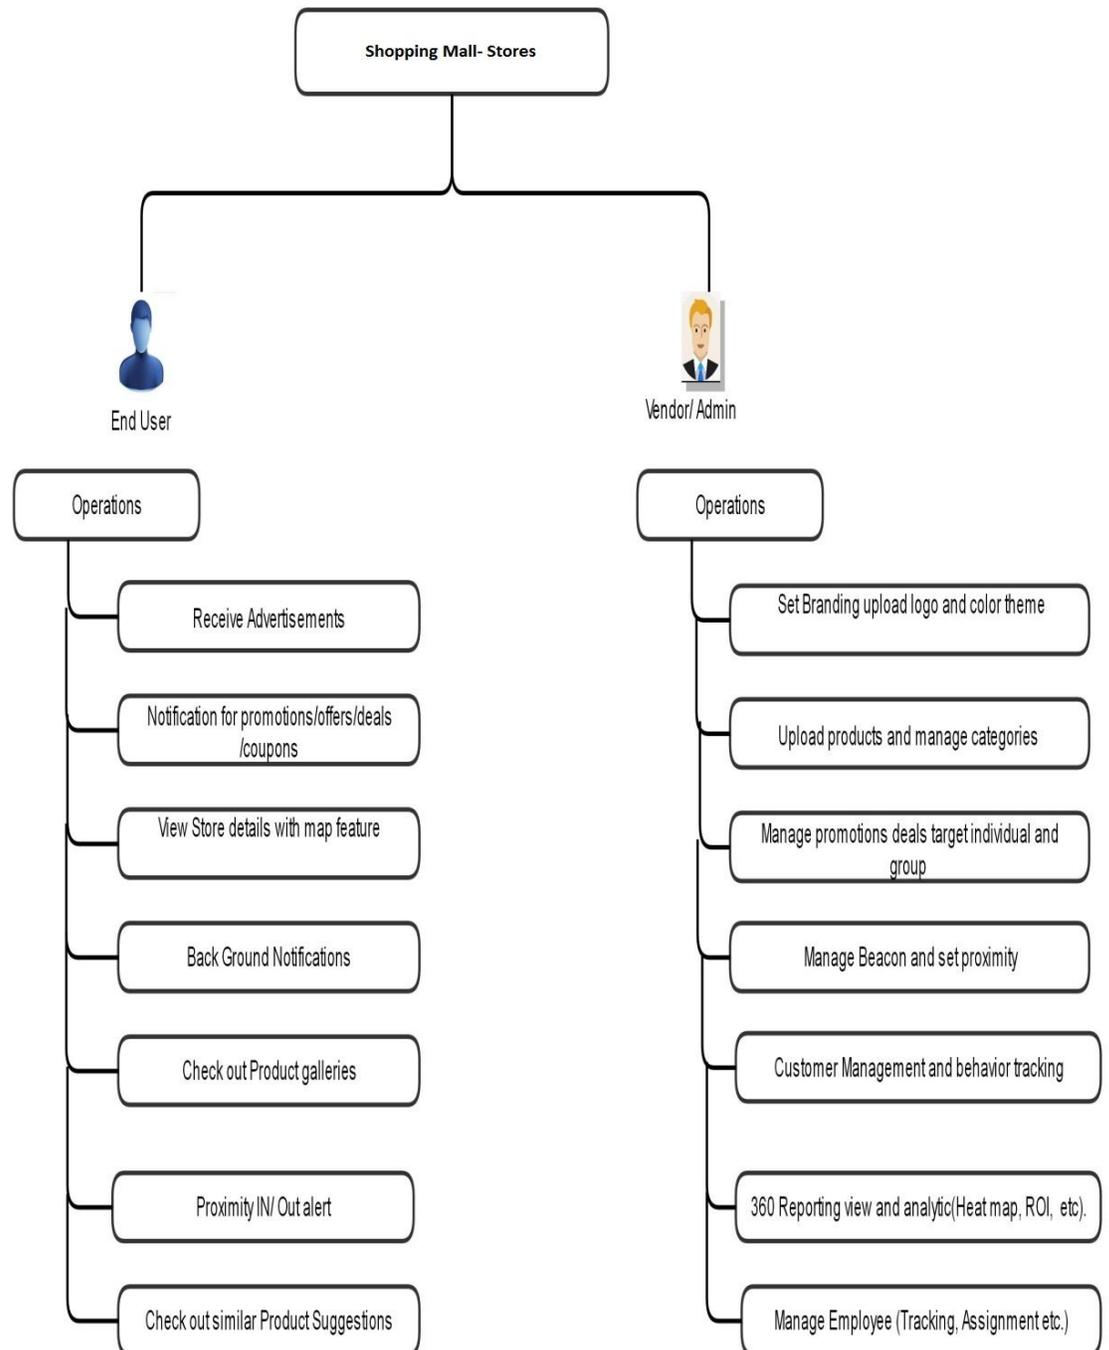

Use case and simulation for Shopping Malls

In today's competitive Retail era, targeting relevant customers and engaging tactics are the two key factors of getting more business and maximizing ROI. By providing users with the relevant and accurate information, you can look forward to increase the foot-traffic which further enhances your brand, promote sales and strengthen the customer relationship.

We have developed a solution that helps you in getting a hold on above crucial factors and give a personalized shopping experience to your customers. Our experts have brain stormed and effectively made use of Proximity, Geo-fencing, Analytic, and Mobility to develop a foolproof solution that can easily take charge of enhancing your business growth and revenue.

Quick Walk through of tremendous features of our product:-
